

# How to Divide a Circle into 5 "Fiveness"

1. Mark the center of your paper with a dot. Using AA & BB in pencil. Draw a circle (O)
2. Place the center of a protractor on the dot, the left line (or 0°) on line B1
3. Make a pencil mark at 72°
4. Dissect the circumference of the A. Circle at 72°.

5. Place the point of your compass on B1 & move the compass (widen it) so that the pencil is at 4. on the circumference. Draw an arc between 4 & 5.
6. Place pt of compass on 5 & draw an arc to 7. (B1 to 7)
7. Place compass pt. on 7 - draw arc from 5 to 6
8. Draw arc from 7 to 4
9. Draw arc from 6 to B1. ERASE Pencil.
